

Model 311A anti-siphon valve with OMNIREG attached

This pressure-regulating device enables the user to quickly and accurately set the optimal system pressure.

FEATURES

- One model fits all heavy-duty commercial 100 series (century plus), 700 series (Ultraflow), 200B and 211A series valves.*
- Maintains downstream pressure for consistent and efficient operation
- Requires only 1 GPM to operate - ideal for low flow applications
- “Drop In” Installation is fast and easy, requiring tightening of only two capture screws - for reduced labour time
- Built in Schroeder valve for independent pressure readings
- Clearly marked dial settings permit precise control of downstream pressure
- Desired pressure may be set with water on or off
- Delivers an accuracy of ± 3 psi
- Low-profile design permits use in applications with limited space
- Schrader valve test port is easily accessible for in-line use
- Manufactured of heavy-duty, corrosion-resistant glass-filled nylon
- Accessible internal module
- Stainless steel and brass hardware
- Vandal (proof) cap to avoid unauthorized use

OPERATING SPECIFICATIONS

- Flow range: 1 to 300 GPM
- Inlet pressure range: Up to 200 psi
- Pressure regulation: OMR-30: 5 to 30 psi, OMR-100: 5 to 100 psi
- Inlet pressure to be 10 psi greater than outlet pressure

* Compatible with Century PLUS (excluding anti-contamination models), 700 UltraFlow® (1", 1½" and 2") and 311A manufactured after 1/1/96; 700 UltraFlow (¾") manufactured after 5/4/96; and 200B manufactured after 12/1/98.

SPECIFYING INFORMATION

OMR - XXX

MODEL	DESCRIPTION
OMR - Modular regulator	30 - 5-30 psi 100 - 5-100 psi DS - Downstream sensing kit**
Example: A regulator to regulate from 5-30 psi = OMR-30
