

FOUR TIPS TO KEEP YOUR DUGOUT OR POND HEALTHY

1. Improve Aeration

- Oxygen levels in the dugout must be sufficient.

Solution: Aeration System

Features

- Better water quality
- Reduces algae
- Eliminates or reduces odors
- De-ices
- Oxygenates
- Healthier fish and plants
- Wide range of flows
- Easy installation
- No electricity in water - safe for swimmers

2. Increase Bacteria

- Beneficial bacteria keeps nutrient levels in check to reduce pond scum and odors.

Solution: Pond Clarifier

Features

- Removes odour and pond scum
- Non-toxic, safe and easy to use
- Greatly improves water clarity
- Assists in the breakdown of wastes and sediments while restoring water health
- Decreases Nitrates, Nitrites, and phosphates

3. Control Algae

- Use a non-toxic algacide to control algae.

Solution: ProClear

Features

- Safe, easy to use and effective
- Algae control and prevention
- Bacterial control
- Odour reduction

4. Reduce Sunlight

- Dying the water reduces light levels in the water which discourages the growth of algae and weeds.

Solution: True Blue Pond Dye

Features

- Brings a natural blue appearance back to your pond
- Filters sunlight penetration for weed control
- Non-toxic and odourless
- Long-lasting
